# Information from the Health Office

## **Students will be sent home for any of the following reasons:**

- Biting
- Fever
- Vomiting and/or Dysentery
- Persistent cough
- Persistent runny nose
- Any nasal discharge other than clear
- Suspect of any communicable disease
- Any wound or sore not properly covered that is oozing or draining

## **Fever**

A student with a fever, or who is sent home from school due to having a fever, must be fever free for 24 hours before returning to school.

## **Antibiotics**

If antibiotics are prescribed for a student, they must be on the antibiotic for 24 hours before returning to school.

## EFFECTS OF LEAD EXPOSURE

Children 1-6 years old are the most at risk for lead poisoning.

- Lead poisoning can harm a child's nervous system and brain when they are still forming, causing learning and behavior problems that may last a lifetime.
- Lead can lead to a low blood count (anemia).
- Even small amounts of lead in the body can make it hard for children to learn, pay attention, and succeed in school.
- Higher amounts of lead exposure can damage the nervous system, kidneys, and other major organs. Very high exposure can lead to seizures or death.

## LEAD POISONING FACTS

- Buildup of lead in the body is referred to as lead poisoning.
- Lead is a naturally occurring metal that has been used in many products and is harmful to the human body.
- There is no known safe level of lead in the body.
- Small amounts of lead in the body can cause lifelong learning and behavior problems.
- Lead poisoning is one of the most common environmental illnesses in California children.
- The United States has taken many steps to remove sources of lead, but lead is still around us.

### IN THE US:

- Lead in house paint was severely reduced in 1978.
- Lead solder in food cans was banned in the 1980s.
- Lead in gasoline was removed in the early 1990s.

## LEAD IN TAP WATER

The only way to know if tap water has lead is to have it tested.

Tap water is more likely to have lead if:

- Plumbing materials, including fixtures, solder (used for joining metals), or service lines have lead in them.
- Water does not come from a public water system (e.g., a private well).

To reduce any potential exposure to lead in tap water:

- **Flush the pipes in your home**  
Let water run at least 30 seconds before using it for cooking, drinking, or baby formula (if used). If water has not been used for 6 hours or longer, let water run until it feels cold (1 to 5 minutes.)\*
- **Use only cold tap water for cooking, drinking, or baby formula (if used)**  
If water needs to be heated, use cold water and heat on stove or in microwave.
- **Care for your plumbing**  
Lead solder should not be used for plumbing work. Periodically remove faucet strainers and run water for 3-5 minutes.\*

- **Filter your water**  
Consider using a water filter certified to remove lead.

**WARNING!** Some water crocks have lead. Do not give a child water from a water crock unless you know the crock does not have lead.

(\*Water saving tip: Collect your running water and use it to water plants not intended for eating.)

- For information on testing your water for lead, visit the Environmental Protection Agency at their [website](http://www.epa.gov) or call (800) 426-4791. You can also visit the California Department of Public Health's website at [www.cdph.ca.gov](http://www.cdph.ca.gov).

## POTENTIAL SOURCES OF LEAD

- Old paint, especially if it is chipped or peeling or if the home has been recently repaired or remodeled
- House dust
- Soil
- Some imported dishes, pots and water crocks. Some older dishware, especially if it is cracked, chipped, or worn
- Work clothes and shoes worn if working with lead
- Some food, candies and spices from other countries
- Some jewelry, toys, and other consumer products
- Some traditional home remedies and traditional make-up
- Lead fishing weights and lead bullets
- Water, especially if plumbing materials contain lead

## SYMPTOMS OF LEAD EXPOSURE

Most children who have lead poisoning do not look or act sick. Symptoms, if any, may be confused with common childhood complaints such as

stomachache, crankiness, headaches, or loss of appetite.

A blood lead test is free if you have Medi-Cal or if you are in the Child Health and Disability Prevention Program (CHDP). Children on Medi-Cal, CHDP, Head Start, WIC, or at risk for lead poisoning, should be tested at age 1 and 2. Health insurance plans also will pay for this test. Ask your child's doctor about blood lead testing.

For more information, go to the California Childhood Lead Poisoning Prevention Branch's [website](http://www.cdph.ca.gov), or call them at (510) 620-5600.

# Facing the Facts: A Parents Guide to the Understand of Child Sexual Abuse

Sometimes parent have to face issues they would rather avoid.

## What is Sexual Abuse?

The sexual abuse of a child occurs whenever any person forces, tricks, or threatens a child in order to have sexual contact with him or her. This contact can include “non touching” behaviors such as an adult exposing himself of asking a child to look at pornographic material. It includes behaviors ranging the sexual handling of a child (fondling), to actual genital contact, to intercourse, to violent rape.

In all instances of child sexual abuse, the child is being used as an object to satisfy the adult’s sexual needs of desires.

“Candy is my best friend. I play at her house a lot. Today her daddy asked us to look at some pictures. They were nasty pictures of people with no clothes on. He said, “Doesn’t that look like fun?” I didn’t think so, but I said, “Yes.”

## Who Get Sexually Abused?

Any child of any age is a potential victim of sexual abuse. Some important facts to keep in mind...

- Although the majority of adult do not sexually assault children, not sexual abuse occurs with an adult the child knows and trusts.
- Most sexual abused goes unreported and undetected.
- Children often keep sexual abuse a secret.

When Mommy goes to work, I stay at Mrs. Jenkins house. I wish I didn’t have to. Mommy says Mrs. Jenkins is a real nice lady, but Mrs. Jenkins’ so Ralph, sometimes makes me do bad things. Yesterday he makes me take of my understand and he put his finger in my privates he said, “You’d better not tell.”

Children may keep sexual assault a secret for many reasons. They may fear rejection, blame, punishment, or abandonment; they may think people won’t believe them. Boys are less likely to report an abuse than girls.

The closer the relationship of the offender to the child, the less likely it is that the child will report the incident.

## How You Can Determine If Sexual Abuse Has Taken Place.

First and foremost, if your children confide that they have been sexually assaulted, believe them. Children very seldom lie about such a serious matter. Also be aware that most sexual abuse does not result in the child being violently attacked or hurt physically. Often there is no physical evidence a child has been molested. Fondling, involvement in a child pornography and oral sex usually presents no physical sign of abuse. But, if a child has been physically harmed as a result of sexual abuse, the following may be signs of this occurrence:

- A discharge from the vaginal area or penis.
- Injury to the genital or anus
- Discomfort in walking or sitting.
- The discovery of a sexually transmitted disease.

Children, especially very young children, are often unable to verbalize that they have been molested. The following are some indicators that sexual assault may have taken place:

- Nightmares and sleep disturbances.
- Bedwetting.
- Fear of certain place or certain people (such as a day care center or friend.)
- Clinging to a parent more than usual.
- Behaving as a younger child (such as an older child sucking his or her thumb.)
- Unexplained changes in behavior at school, daycare, or in relations with peers.
- Withdrawal.
- Acting out the abuse with dolls, friends, or through drawings.
- Excessive masturbation.

Keep in mind that although these are the most common signs of sexual abuse, there may be other causes for these changes. However, sexual abuse should not be ruled out as a possibility.

## IMPORTANT INFORMATION FOR PARENTS

### CAREGIVER BACKGROUND CHECK PROCESS CALIFORNIA DEPARTMENT OF SOCIAL SERVICES

The California Department of Social Services works to protect the safety of children in child care by licensing child care centers and family child care homes. Our highest priority is to be sure that children are in safe and healthy child care settings. California law requires a background check for any adult who owns, lives in, or works in a licensed child care home or center. Each of these adults must submit fingerprints so that a background check can be done to see if they have any history of crime. If we find that a person has been convicted of a crime other than a minor traffic violation or a marijuana-related offense covered by the marijuana reform legislation codified at Health and Safety Code sections 11361.5 and 11361.7, he/she cannot work or live in the licensed child care home or center unless approved by the Department. This approval is called an exemption.

A person convicted of a crime such as murder, rape, torture, kidnapping, crimes of sexual violence or molestation against children **cannot by law be given an exemption that would allow them to own, live in or work in** a licensed child care home or center. If the crime was a felony or a serious misdemeanor, the person must leave the facility while the request is being reviewed. If the crime is less serious, he/she may be allowed to remain in the licensed child care home or center while the exemption request is being reviewed.

#### How the Exemption Request is Reviewed

We request information from police departments, the FBI and the courts about the person's record. We consider the type of crime, how many crimes there were, how long ago the crime happened and whether the person has been honest in what they told us.

The person who needs the exemption must provide information about:

- The crime
- What they have done to change their life and obey the law
- Whether they are working, going to school, or receiving training
- Whether they have successfully completed a counseling or rehabilitation program

The person also gives us reference letters from people who aren't related to them who know about their history and their life now.

We look at all these things very carefully in making our decision on exemptions. By law this information cannot be shared with the public.

#### How to Obtain More Information

As a parent or authorized representative of a child in licensed child care, you have the right to ask the licensed child care home or center whether anyone working or living there has an exemption. If you request this information, and there is a person with an exemption, the child care home or center must tell you the person's name and how he or she is involved with the home or center and give you the name, address, and telephone number of the local licensing office. You may also get the person's name by contacting the local licensing office. You may find the address and phone number on our website. The website address is <http://ccld.ca.gov/contact.htm>.

# Fountain Valley Montessori Policy and Precautions

With the flu season in full force, we are requesting complete cooperation from each family to abide by our “Illness Policy”. Unfortunately, many students are being sent to school sick or are being sent back before they are completely symptom free. We understand that many of our families are working parents; however, we are obligated to maintain the best health environment for our students and staff. When children are sent to school sick, this spreads communicably throughout the classrooms. Not only does this affect our children and staff, but their family members are being exposed as well. This is especially dangerous for those who may have chronic illnesses or compromised immune systems.

**Influenza**, also known as the flu, is a contagious disease that is caused by the Influenza virus. It attacks the respiratory tract in humans (nose, throat, and lungs). The flu is different from a cold. Influenza usually comes on suddenly. These symptoms are usually referred to as “flu-like symptoms”. Most people who get Influenza will recover in one to two weeks.

**How the Influenza Virus is Passed Around:** The flu is spread, or transmitted, when a person who has the flu coughs, sneezes, or speaks and sends flu viruses into the air, and other people inhale the virus. The virus enters the nose, throat, or lungs of a person and begins to multiply, causing symptoms of Influenza. Influenza may, less often, be spread when a person touches a surface that has the flu virus on it – a door handle, for instance – and then touches his or her nose. The flu is contagious, a person can spread the flu starting one day before he or she feels sick. Adults can continue to pass the flu virus to others for another three to seven days after symptoms start. Children can pass the virus for longer than seven days. Symptoms start one to four days after the virus enters the body. Some persons can be infected with the flu virus but have no symptoms. During this time, those persons can still spread the virus to others.

**Fountain Valley Montessori Illness Policy (listed in our Parent Handbook):** An ill child will not be allowed to enter the classroom. If a child becomes ill at school, the parent will be contacted to arrange for the child’s care. The child must be picked up by the parent or authorized person within **30 minutes** of notification. If you are unable to meet the 30-minute requirement, we will then call an authorized person on the Emergency List. Any child that has been sent home with a fever, diarrhea, persistent cough and/or discolored nasal drainage will **not be allowed** to return to school until the child is **symptom free** for a **complete 24 hours**. For example, if your child is sent home Monday at 3:00pm, and the fever breaks that evening at 10:00pm, he/she may not return to school until Wednesday. Also, any child that has contracted an infectious or communicable disease will be required to submit a doctor’s release in order to return to school.

Please know, we are actively encouraging all children and staff to practice preventative measures with this flu season. We encourage all children to wash their hands frequently, practice grace & courtesy with coughing and sneezing, and to wear warm clothing when outdoors. We ask that you take these measures at home as well. Please notify us if your child becomes ill and will be absent from school.

**Assumption of Risk and Waiver of Liability Relating to Coronavirus /COVID-19**

Parent/Legal Guardian: \_\_\_\_\_

Child's Name: \_\_\_\_\_

The novel coronavirus, COVID-19, has been declared a worldwide pandemic by the World Health Organization. COVID-19 is reported to be extremely contagious. The state of medical knowledge is evolving, but it is believed that the virus is spread from person to person contact and/or by contact with contaminated surfaces and objects, and even possibly in the air. People reportedly can be infected and show no symptoms and therefore spread the disease. The exact methods of spread and contraction are unknown, and there is no known cure for COVID-19. Federal, State, and local governments and health agencies recommend social distancing and have, in many locations, prohibited the congregation of groups of people.

In accordance with recommended guidance and protocols issued by various government and public health agencies, including but not limited to the World Health Organization (WHO), the Centers for Disease Control and Prevention (CDC), the California Department of Public Health (CDPH), the Orange County Health Care Agency (OCHCA) and the California Department of Social Services (Community Care Licensing Division), Fountain Valley Montessori has put in place preventive measures to reduce the spread of COVID-19. However, it is not possible to prevent entirely against the presence of the virus.

By signing this agreement, I acknowledge the contagious nature of COVID-19 and voluntarily assume the risk that my child(ren) and I may be exposed to or infected by COVID-19 while utilizing Fountain Valley Montessori's services or premises. These services are of such value to me and my child(ren) that I accept the risk of being exposed to, contracting and/or spreading COVID-19 in order to utilize these services. I voluntarily agree to assume all of the foregoing risks and accept sole responsibility for any damage, loss, claim, liability or expense of any kind, and injury to my

child(ren) or myself (including, but not limited to, illness, personal injury, disability, and death). I hereby forever release and waive my right to bring suit against any owner, director, teacher, staff member or other employee in connection with exposure, infection and/or spread of COVID-19 related to utilizing these services. I understand this means I give up my right to bring any claims against Fountain Valley Montessori for personal injury, death, disease, property loss or other loss, including but not limited to claims of negligence. I give up any claim to seek damages, whether known or unknown, foreseen, or unforeseen. I agree to immediately notify Fountain Valley Montessori if I, anyone in my household, or my child(ren) experiences symptoms of COVID-19, including, but not limited to fever, cough or shortness of breath, or if I, anyone in my household, or my child(ren) has a suspected or diagnosed/confirmed case of COVID-19 or exposure to anyone with a confirmed case of COVID-19.

I understand that tuition is determined on an annual basis. There will be no reductions, credits, or refunds for any tuition payments due or have been paid, because of mandated school closures due to COVID-19.

MY SIGNATURE INDICATES THAT I HAVE READ CAREFULLY AND FULLY UNDERSTAND ALL THE CONDITIONS OF THIS RELEASE AND FREELY AND KNOWINGLY ASSUME THE RISK AND WAIVE MY RIGHTS CONCERNING LIABILITY AS DESCRIBED ABOVE.
