

Room 4 Lower- Ms. Yasmin & Ms. Kinnari:

Hello Parents,

Hello November! It is finally starting to feel like fall outside! Last month was very productive and the students engaged in many new subjects. We have been building connections with your children and we are discovering their amazing personalities!

This month we will be exploring the continent of Europe. We will tour some of the countries such as the United Kingdom, France, and Germany. The children will learn about the physical location of the countries and their neighboring land and water forms. Europe abounds in natural and manmade landmarks, and we will learn about them. The rich cultural heritage and history along with the unique animals that inhabit this continent will also be reviewed. We will learn about the formation of a lake and an island as we learn about landforms. I am look forward to introducing the lifecycle of a pumpkin for our Botany presentation and our study of Zoology will focus on parts of a tortoise. We will also work with sentence construction and writing as we work with fall themed starter sentences. The children will be learning the terms for animals in Spanish class.

In addition to our monthly cultural unit, we learn about an artist and a composer each month. My heart filled with much joy listening to the children build connections with action painting inspired by Jackson Pollock last month! I am looking forward to a similar experience when we work on pointillism art inspired the famous French poet and impressionist, Georges-Pierre Seurat. This will be our first attempt at group painting, and I am excited for the children to express their own techniques for our group masterpiece. The composer for November will be the "King of Rock and Roll" Elvis Presley. I will also try my best to demonstrate a few of his unique dance moves! Wish me luck!
